Berit Gundersen, Dean

Srikanth Kolluru, Associate Dean, Academic Affairs

Miki Park, Interim Associate Dean, Graduate Education & Research,
Director of PCSP

Allen Shek, Associate Dean, Professional Programs

Jim Uchizono, Associate Dean, Office of Student Affairs and Admissions

Marcus Ravnar, Associate Dean, Pharmacy Undergraduate Programs

Contents

- Pharmacy
- Pharmaceutical and Chemical Sciences
- Applied Science
- Pharmaceutical Science
- Pharmacy Business Management Certificate

A professional school dedicated to the education and training of pharmacists in modern health care delivery.

Mission

The mission of the Thomas J. Long School of Pharmacy is to prepare students for lifelong success in health careers by providing an excellent, student-centered learning environment. We aspire to develop leadership skills in our students and a strong commitment to their professions, interprofessional collaboration and society. These efforts are assisted by linkages across University of the Pacific professional and liberal arts programs. We support outstanding professional and graduate teaching, research and other scholarly activity and services as a means of achieving our mission.

Graduate Degree Programs in Pharmacy

The Thomas J. Long School of Pharmacy offers programs leading to the Master of Science and Doctor of Philosophy degrees and the combined PharmD/PhD degree program. This unique dual-degree program is intended for students who are interested in careers in research, teaching or business but who wish to also possess a professional degree in pharmacy. The entrance requirements for the combined program include all pre-pharmacy PharmD requirements and certain other standards. A baccalaureate degree with a minimum GPA of 3.0 is required for entry into the PharmD/PhD program.

The school provides a scholarly environment to support research in basic and applied pharmaceutical sciences, to encourage fundamental discovery in healthcare sciences and the attainment of advanced degrees. The School attempts to provide students the opportunity for interdisciplinary programs within the pharmaceutical sciences. Students are encouraged to combine the specialties of several of the faculty into unique interdisciplinary programs which meet their individual educational objectives.

Additional information on the graduate program and dual-degree program may be found on the website for the PhD and MS programs, <https://www.pacific.edu/pharmacy/pcsp>. Interested individuals may obtain further information by writing directly to the Associate Dean, Office of Student Affairs and Admissions in the Thomas J. Long School of Pharmacy for the Pharmaceutical and Chemical Sciences Graduate Program.

Programs Offered

Master of Science in Pharmaceutical and Chemical Sciences

Doctor of Philosophy in Pharmaceutical and Chemical Sciences

**Doctor of Pharmacy/Doctor of Philosophy in Pharmaceutical and
Chemical Sciences**

**Doctor of Pharmacy/Master of Science in Pharmaceutical and Chemical
Sciences**

Program Description

Master of Science and Doctor of Philosophy degrees are available in five areas of interdisciplinary emphasis: (1) Bioanalytical Chemistry, Physical Chemistry, and Biochemistry, (2) Molecular-Cellular Physiology and Pharmacology, (3) Chemical Synthesis, Drug Discovery and Design, (4) Biopharmaceutical Sciences, and (5) Health Care Outcomes and Clinical Services.

The Graduate Program also offers combined PharmD/PhD and PharmD/MS degrees. These unique dual-degree programs are intended for students who are interested in careers in research and teaching, but who wish to also possess a professional degree in pharmacy.

The goal of the Pharmaceutical and Chemical Sciences Program (PCSP) curriculum is to prepare students for the challenges of both basic and applied research, to advance knowledge in an area of specialization, to encourage fundamental discovery in the chemical, pharmaceutical and healthcare sciences, and to attain advanced degrees. Faculty from the departments of chemistry, pharmaceutical sciences, and pharmacy practice bring their research interests and expertise to the program. Students are encouraged to combine the talents of the faculty into a unique, student-centered and interdisciplinary program that meet their individual educational goals. Upon the completion of the education from PCSP, graduates are self-motivated learners who possess broad knowledge in pharmaceutical and chemical sciences and specialized knowledge in their area of focus, as well as research and experimental skills needed for success in pharmaceutical, biotechnological, and chemical industries or academia.

Admission Requirements

Entering students should have the equivalent of a Pacific Bachelor's degree with at least a "B" average (3.0 GPA) in all upper-division coursework. GRE is not required but can be submitted to demonstrate an applicant's academic strength.

Depending on the research focus area, there are minimum undergraduate units required in the mathematical, physical, chemical, pharmaceutical and biological disciplines.

Students should also include an essay or personal statement that focuses on their career objectives and personal ideals, and three letters of recommendation, no more than one-year-old.

International Students: In addition to meeting coursework, GPA requirements, international students whose native language is not English must submit their TOEFL (Test of English as a Foreign Language) scores when they apply to the program. The minimum acceptable score is 550 (paper-based) or 80 (Internet-based). Those students who want to be considered for a Graduate Assistant (GAs) position, must score at least 575 (paper-based test), or 90 (Internet) on TOEFL and are required to demonstrate English speaking skills by interview. TOEFL scores can be no older than two-years-old. Students must also provide financial support documentation, which can be no older than six months old. We also accept IELTS (International English Language Testing System) and Duolingo scores. Students considering a GA position must score at least 7.0 on IELTS or 110 on Duolingo. The minimum score for admission is 6.5 on IELTS or 105 on Duolingo.

International students who attended schools outside of the United States must submit an evaluation of their academic records, unless the coursework was taken before earning a graduate degree from a U.S. institution. Transcripts must be reviewed by one of the following outside evaluation agency: WES (World Education Services), www.wes.org, or Educational Credential Evaluators (ECE), www.ece.org. Please request a course-by-course evaluation that includes a grade point average (GPA) and have an official copy sent directly to the Office of Graduate Admission. Student transcripts need to be translated into English before an evaluation can be processed. Please check with the evaluation agency for details on specific document requirements.

Please refer to the Admissions section of this catalog or visit www.pacific.edu (<http://www.pacific.edu/>) and go to the Graduate web page and consult the International Applicants and Transcript Evaluation sections for up-to-date admissions criteria or for more information concerning other required application materials and instructions.

PharmD/MS and PharmD/PhD Programs

This dual-degree program combines the features of the professional PharmD degree with the teaching and research components of the MS and PhD. It offers a unique opportunity for students who intend to extend their professional pharmacy training into a career in teaching and/or research. The combined program trains outstanding teachers and researchers who are in high demand for employment by industry and academia.

Program Description

The PharmD/MS is usually completed in a minimum of four years and the PharmD/PhD in a minimum of five years. During the first two years, students concentrate on the PharmD curriculum but take graduate level elective courses when possible. The Doctor of Pharmacy curriculum is described in the University's General Catalog. Students do not need to decide in which area of pharmaceutical science they will focus on when applying to the program, but they are expected to choose an area of research concentration and a research advisor by the end of their first year of study. The later years of the program are devoted to graduate course work, experiential training in the Stockton area, research, and thesis or dissertation writing. The State Pharmacy Board Exam may be

taken following completion of the Doctor of Pharmacy curriculum, usually in the fourth year.

Admission Procedure

The minimum requirement for admittance to the program is a BA or BS degree with a GPA of 3.0 or greater. The application process requires separate applications to the PharmD professional program and the graduate programs. The Office of Admission accepts two letters of recommendation and transcripts submitted with the PharmD application. Four additional items are required for admission:

1. The completed graduate application form;
2. A personal statement from the applicant stating his/her goals relative to research and/or teaching career and selecting one of the five tracks preferred;
3. GRE scores on the General Exam; optional, but strongly encouraged to strengthen the application, (taken within the past five years).
4. A letter of recommendation from someone who is familiar with the student's research abilities. If such a letter is already included in the PharmD application, a third letter from an academic person is acceptable.
